Completed on 2077 (2020 AD).

Bachelors of Computer Application

Gaindakot-2

Oxford College of Engineering and Management

Apr, 2021 - Present

PROJECTS

Courier Tracking System

Built a real-time courier tracking system using Laravel. The system allows users to track parcel status with a unique tracking ID, manage courier entries, and view delivery updates. Focused on clean UI, efficient backend logic, and database relationships for seamless package tracking.

Mobile Shop Management System

Developed a desktop-based application to manage sales, inventory, and customer records for a mobile shop. The system includes features like product entry, billing, stock updates, and report generation. Designed to streamline shop operations and improve record-keeping efficiency.

ACHIEVEMENTS

SKILLS

Web Development(HTML,CSS,javascript), Wireframing and Prototyping with Figma, Backend PHP/Laravel, React JS

LANGUAGE

Nepali, Hindi, English
